

Exclusive Indonesian COAL Directory, 2016 - 2017

Phenomenon of declining coal price in the last several years has made this excellent business to plummet badly. Presently, lots of coal mining companies like not to be in operation rather than they have to spend a great deal of cost and energy since the obtained margin is very thin. According to Director General of Minister of ESDM there are 3,000 mining permits which have been issued. However, in line with difficult condition, many companies are not in operation anymore.

This condition is also experienced by large sized coal mining companies, either public listed or non public listed companies. Many of them did not expand their business and some of them decreased their production capacity so they suffered from financial difficulty. To save their operation, the companies took the step of joint venture with foreign companies. Also, there were companies which laid off their employees.

Based on the investigation output and data compilation of CDMI that there are many coal companies of which their ownership was already acquired by other mining companies, either domestic or foreign companies.

Therefore, the structures of committee and management of the companies were changed. There were also many mining companies which have changed their address.

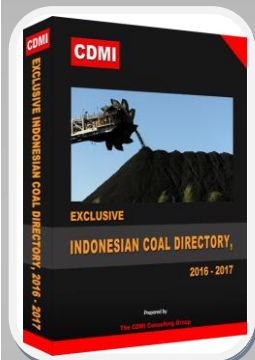

This Directory book contains more than 700 coal mining companies which have updated their data such as address, telephone number, fax number, mining location, mining width, production capacity, coal type, structures of director board and others.

This directory book is only published by CDMI and it can be directly ordered to our marketing division directly Mrs. Tina by phones (021) 3193 0108, 3193 0109, 3193 0070 or facsimile (021) 3193 0102 and e-mail; marketing@cdmione.com at a price of US\$ 420.

Having submitted this offer, we thank you for your cooperation and look forward to hearing your response promptly.

Cordially Yours,
P.T. CDMI
